Water is essential for all known forms of life.

Water is the “blood” of the world, giving life to plants, animals and humans. Therefore water should be pure and vital!
WATER’S EFFECT ON THE BODY

**Moistens tissues** such as those in the mouth, eyes and nose

**Protects** body organs and tissues

**Helps prevent** constipation

**Helps dissolve** minerals and other nutrients to make them accessible to the body

**Regulates** body temperature

**Lubricates** joints

**Lessens the burden** on the kidneys and liver by flushing out waste products

**Carries** nutrients and oxygen to cells

LOOKING AT THIRST OVER A ONE DAY PERIOD

06:00  WAKE UP

WHEN YOU WAKE UP
Your body is dehydrated in the morning. You lose 12 oz. of body fluid during sleep.

12:00  WORKING

AT THE OFFICE OR SCHOOL
Don’t neglect thirst at your desk. Your body fluid decreases.

15:00  EXERCISE

WHEN EXERCISING
Be careful with excessive perspiration.

18:00  BATH TIME

DURING BATH TIME
You perspire more than you imagine.

00:00  SLEEPING

WHEN DO YOU NEED TO DRINK WATER?

½ YOUR WEIGHT IN OUNCES DAILY!

DAY

• When you wake up
• ½ Hour before breakfast
• ½ Hour before lunch

NIGHT

• ½ Hour before dinner
• 1 Hour after dinner
• ½ Hour before bed
THE FACTS ABOUT DEHYDRATION

• Our muscle and brain tissue is roughly 70% water, yet it’s estimated that over 75% of Americans are chronically dehydrated

• Research indicates that 8-10 glasses of water a day could significantly ease joint and back pain for up to 80% of sufferers

• Over 37% of Americans thirst mechanism is so weak that it’s often mistaken for hunger

• #1 trigger of daytime fatigue

• A mere 2% drop in body water can trigger short-term memory loss, trouble with basic math and difficulty focusing on the computer screen or a printed page.

• 5 glasses of water per day can reduce the risk of colon cancer by 45%, breast cancer by 79%, and bladder cancer by 50%

• Even mild dehydration will slow down the metabolism as much as 3%

• Studies show that athletic performance diminishes with as little as 2% body dehydration
Tissues and organs become acidic and rob calcium from bones to neutralize acidity.

Calcium deposits develop in fatty tissues (like breasts).

Bones are “shorted” of calcium and become weak, brittle and porous.

Eat & drink acidic substances
Little or no exercise
Poor digestion
Poor bowel elimination

Acidosis in our body causes:
- Declining health
- Chronic illness
- Cancer
- Osteoporosis
- Arthritis
- Blocked lymph nodes
- Inadequate perspiring
- Scaly skin
- Receding gums
- Intestinal polyps
- Systemic inflammation
- Accelerated aging
- And hundreds more…

REASONS TO DRINK ALKALINE WATER

- Research shows that raising the pH of your urine by just 1 pH can prevent or eliminate the symptoms of metabolic syndrome:
  - Obesity
  - High blood pressure
  - High blood cholesterol
  - High blood sugar
  - Kidney stones

- One study on alkaline water’s ability to reduce blood pressure showed that alkaline water supplied beneficial levels of calcium and magnesium even for people with health problems that impair their ability to absorb those minerals.

- Alkaline water has been shown to reduce oxidative stress in the body that affects the liver. A recent study showed an average 43% reduction in t-bars – (thiobarbituric acid reactive substances) – chemicals in the body that cause liver damage.

- Alkaline water has also been shown to increase levels of a critical antioxidant that protect the liver. Superoxide dismutase - (sod) breaks down bad cholesterol and hydrogen peroxide in the liver. Higher levels of sod in the liver help cleanse blood efficiently.

- Weight Loss from Alkaline Water
  At the beginning of the study, the average weight of the 4 participants was 255 Lbs. After one month, participants’ average weight had dropped to 249 lbs. After two months, study participants’ average weight was 243 lbs., for an average of 12 lbs. lost after two months of alkaline water. Study participants made no changes to their diet other than consuming alkaline water.
MORE REASONS TO DRINK ALKALINE WATER

- A study looked at groups of people which included people with digestive problems that cause mineral deficiencies. The study showed that **alkaline water provided increased mineral absorption even in the presence of clinical digestive deficiencies**.

- **Alkaline water has an antacid effect** which can lead to fewer upset stomachs, and improve overall **digestive health**. Measurement of stomach pH levels after drinking alkaline water showed that stomach pH increased by .5 to 1 pH. The beneficial antacid effect lasted for a half hour after the water was used.

- Research on **women over 75 years of age** shows that drinking alkaline water led to **significant decreases in two indicators that doctors use to measure the rate of bone loss**. Parathyroid hormone (pth) – controls calcium and phosphorus levels. Serum c-telopeptide (ctx) – used to measure bone turnover.

- **Age-fighting antioxidants** - drinking alkaline water has been shown to **increase antioxidant levels in the body** by an average of 38% and **reduce the levels of damaging free radicals** by 43% according to research. Researchers in the most recent study reported that antioxidant levels of test subjects improved significantly in just 4 weeks!

- **Alkaline Water Hydrates You Better**
  Alkaline water mixed with electrolytes provides a noticeable performance boost, and helps the body retain the water it needs. Electrolytes are composed of minerals like potassium and calcium. Your body absorbs minerals from water 30% faster and easier than it does from food or supplements – so drinking water is the best way to get your electrolytes. Electrolytes taken with alkaline water are absorbed even faster, you can actually feel the difference!
In 2010, the MSU health and human department, Professor Dan Heil and a team of graduate and undergraduate students conducted a study that found that individuals drinking alkaline water were better hydrated and had higher pH levels than those who consumed non-alkaline water.

HOW DOES THE IONIZER WORK?

ELECTROLYSIS

Water passes over platinum electrode plates

The electrical current of the plates separates minerals and ions

Healthy alkaline minerals (calcium & magnesium) & negative ions (antioxidants) are attracted to the alkaline side

Alkaline water contains hydroxide minerals, more absorbable than carbonate minerals found in regular water.

Process separates water into negatively charged (antioxidant) alkaline water & positively charged unhealthy acidic water

Unhealthy minerals and positive ions (free radicals) attracted to the acidic side

Increases absorption of minerals by up to 30%!

Superior hydration, mineral absorption, and detoxification

BOTTLED ALKALINE WATER vs. Alkaline Ionized Water

Why Life Ionizers is the best choice for water purity:
A LIFE Ionizer makes better water, protects you from the chemicals in bottled water, and saves you money. LIFE Ionizers has the best filtration of all water ionizers on the market today because Life Ionizers pulls your Federal Water Report, analyzes it, then builds a custom pre-filtration system that ensures your water is purified of toxins in it.

Bottled alkaline water is expensive:
You will save a lot of money in the long run by buying a life ionizer instead of a bottle of alkaline water. A life ionizer will be a onetime purchase while buying bottled alkaline water will be an ongoing expense. With a Life alkaline water ionizer, you will save money, and have an unlimited supply of safe, healthy drinking water. If you continue to buy regular bottled water, your supply is always limited, and it would easily cost over $1,000 a year’s supply for one person!
Help the Environment:
The problem is that plastic bottles create a lot of waste. You can have the same convenience by making ionized alkaline drinking water at home and putting it in one of Life’s stainless steel 750 ml bottles which preserve the pH and the ORP of the water. Life also has reusable 2.2 liter and 1 gallon BPA-free plastic bottles that you can fill with ionized alkaline water. In the United States, six out of seven bottles are not recycled. The toxins from these plastic bottles seep out into the soil and watersheds.

Actually Alkaline?
Bottled alkaline water shows the pH of their water at the time of bottling, but by the time you buy and are ready to enjoy your alkaline water, it could be back to neutral. The ORP or anti-oxidants within alkaline ionized water is one of the most beneficial aspects, but this is also one of the first things that dissipates after it is produced. This is why the benefits of alkaline ionized water can only be felt from a water ionizer and the water should be consumed within 72 hours.

A water ionizer uses far less energy and water to make healthy water and it’s a lot cheaper than bottled water. Another downside to bottled water is that it can contain chemicals like BPA. A water ionizer filters chemicals from your water so you can be assured the water is healthy for you.
HOW DOES THE IONIZER WORK?

ANTIOXIDANTS

Oxidation Reduction Potential (ORP) is a way to measure antioxidants in water by testing its electrical charge.

(+): Positive ORP = free radicals (bad)
(-): Negative ORP = antioxidants (good)

- Alkaline ionized water has a very strong (-) negative ORP, lots of electrons!
- Antioxidants (-) neutralize free radicals (+)
- Antioxidants can help prevent disease like cancer, cardiovascular disease, immune dysfunction, and much more!

Anderson started making small lifestyle changes 13 years ago after being diagnosed with Type 2 diabetes.

"I started eating healthier and in moderation, but I was still sort of eating the same stuff that I'd been eating all my life," he admits.

That all changed in 2008. "When I was cast in Law & Order, I decided to make a drastic change," says Anderson. "I got more serious about my health and appearance – not from a vanity standpoint. I just started making healthier choices."

Recently, he has taken healthy eating to the next level by using the Life M11 Water Ionizer along with his other healthy lifestyle choices.

"I’ve got my very own Fountain of Youth and I’d like to tell you about it: I got my Life Ionizer when I heard about the amazing health benefits of alkaline water. I chose Life after I tried the water for myself; it is the most refreshing water I’ve ever drank! Plus, it feels amazing. I have the energy I need to keep up with my busy schedule, and I feel great! It makes a big difference in my health and my lifestyle, and I know it will in yours too."

Anthony Robbins
Inspirational Psychologist

“Alkalize your body and live a healthier, more energized, and ultimately more fulfilling life. Our acid-alkaline balance is a baseline determinant of our physical health. When you break your old eating patterns, you will find yourself getting back to the real you, filled with the vitality and energy that your desire and deserve.”

Dr Otto Heinrich Warburg

“Dr. Otto Warburg discovered the root cause of cancer in 1923 and he received the Nobel Prize for doing so in 1931. Dr. Warburg was director of the Kaiser Wilhelm Institute (now Max Planck Institute) for cell physiology at Berlin. He investigated the metabolism of tumors and the respiration of cells, particularly cancer cells. Below are some direct quotes by Dr. Warburg during medical lectures where he was the keynote speaker.”

Ray Kurzweil
Author, Inventor & Futurist

“There are more benefits to "alkaline water" than simply the alkalinity or pH. The most important feature of alkaline water produced by a water ionizer is its oxidation reduction potential (ORP). Water with a high negative ORP is of particular value in its ability to neutralize oxygen free radicals.”
